Business item(s) presented:

President Bert led the club in a public vote for our newest member: Michelle. Vote was unanimous

Trivia Question: In which constellation is the hottest place in the universe located?

• Virgo • Amana • Daystar

The hottest place in the universe is a cloud of gas surrounding a swarm of galaxies that are clustered together in the constellation. The temperature there reaches 300 million degrees Celsius. The cloud is believed to have been formed as a result of colliding galaxies going at speeds of 2,500 miles per second.

Respectfully Submitted: MeL Konrad, Secretary
